SUBJECT: APPLY FOR WEB DEVELOPER – MR. PYCHEY PRAK

Dear Mr. Sokrom,

With all my respect, I am writing in response to your search for a Web Developer. It appears that my professional qualifications and career interests are well aligned with your requirements. I am applying for this position as I believe it strongly matches my skills and experiences.

I am currently a student of Computer Science at the Institute of Digital Technology (IDT).

I have completed several school and personal projects as a Web Developer, participated in other competition programs, and volunteered as instructor in educational programs.

I have attached my cover letter and resume. Please take a moment to review them to get a better picture of my background and capabilities.

I would love the opportunity to discuss this position in more detail. It would be a great pleasure to hear back from you regarding my application.

Sincerely,
Pychey Prak

Subject: Applying for Web Developer Intern at Metfone

Dear Mr. Sokrom:

I am writing to express my interest in a Web Developer position at your company. I am currently pursuing a Bachelor of Computer Science at Cambodia Academy of Digital Technology and have been actively building fullstack web applications through academic and personal projects.

Through my projects, I have gained hands-on experience with modern web technologies including React, Next.js, Node.js, Express, and relational databases. I have developed real-time multiplayer applications using Socket.IO, as well as a fullstack online learning platform, which strengthened my understanding of API design, authentication, and scalable project structure. These experiences have helped me become comfortable working across both frontend and backend development.

In addition to technical skills, I value teamwork and enjoy working with like-minded people who are passionate about building meaningful products. I also volunteered as a JavaScript instructor, which improved my communication skills and reinforced my understanding of core programming concepts.

I am excited to continue learning, contribute to real-world projects, and grow as a professional web developer. You can view my projects on my GitHub: GitHub (https://github.com/pychey).

Thank you for your time and consideration. I'm looking forward to the opportunity to work with your team and contribute to exciting projects.

Sincerely,

Pychey

Pychey Prak

PYCHEY PRAK

— WEB DEVELOPER

National Road 6A, Sangkat Prek Leap, Khan Chroy Changva, Phnom Penh

ABOUT ME

Dedicated Web Developer with strong interest in building modern fullstack applications. Experienced in developing real-time and interactive web systems through academic and personal projects. Passionate about writing clean, maintainable code and continuously improving technical skills. Enjoy working in collaborative environments with like-minded teammates, sharing ideas, solving problems together, and contributing to meaningful projects.

EDUCATION

2024 - 2028
CAMBODIA ACADEMY OF DIGITAL TECHNOLOGY

- Bachelor of Computer Science

HARD SKILLS

- HTML, CSS, JS, TypeScript
- React.js, Next.js, Tailwind
- Node.js, Express.js, Nest.js
- PostgreSQL, Socket.IO, Git

SOFT SKILLS

- Team collaboration
- Communication
- Problem-solving
- Fast learner and adaptability

LANGUAGES

- Khmer (Fluent)
- English (intermediate)

REFERENCE

Available upon request

WORK EXPERIENCE

Multiplayer Sudoku Game App Project — OCT 2025 - JAN 2026
Backend Developer Member

- Built a real-time multiplayer Sudoku application using Flutter for frontend and Node.js with Socket.IO for backend.
- Implemented live board synchronization and multiplayer handling.
- Managed server communication and game state updates for smooth real-time interaction.

Online Learning Web Application — Aug 2025 - Oct 2025
Fullstack Developer Member

- Developed a fullstack online learning platform using Next.js with integrated frontend and backend features.
- Implemented authentication flow, and dynamic content rendering.
- Designed scalable project structure for future expansion of video and course management features.

Next Gen Enhancement Program — Aug 2025 - Oct 2025
JavaScript Volunteer Instructor

- Taught fundamental JavaScript concepts including variables, functions, DOM manipulation, and basic problem-solving.
- Assisted students in hands-on coding exercises and guided them through small web projects.

Multiplayer Catte Game School Project — May 2025 - Aug 2025
Fullstack Developer Member

- Designed and developed a real-time multiplayer card game using React, Node.js, Express, and Socket.IO.
- Implemented game logic, room-based multiplayer system, and real-time synchronization between players.

ASSIGNMENT: COMMON JOB INTERVIEW QUESTIONS

1. Tell me about yourself
I am a junior Computer Science student at Cambodia Academy of Digital Technology (2024–2028), passionate about web development. I have hands-on experience building fullstack applications using React, Next.js, Node.js, Express, Socket.IO, and relational databases. My projects include a real-time multiplayer Catte game, an online learning platform, a multiplayer Sudoku app, and a React-based Pomodoro timer (Clockodoro). I also volunteered as a JavaScript instructor, which strengthened my teamwork and communication skills.

2. Why are you interested in this role/company?
I am excited about this role because it offers the opportunity to work on real-world web development projects and collaborate with a team of like-minded developers. I want to contribute my skills to create interactive and user-friendly applications while learning from professionals and growing as a web developer.

3. What are your strengths?
- Strong technical skills in frontend and backend development
- Quick learner who adapts to new technologies efficiently
- Team player who communicates and collaborates effectively
- Problem-solving mindset with the ability to debug and optimize code
-

4. What are your weaknesses?
I can sometimes be overly detail-oriented, spending extra time perfecting small things. I also occasionally take on too many tasks at once. To manage this, I use time management tools and prioritize tasks based on importance and deadlines.

5. Can you describe a challenging project you worked on?
In the Multiplayer Catte Game project, I faced the challenge of syncing game state between multiple players in real-time. Handling concurrent moves and server-side logic was difficult, but I successfully implemented a stable system using Socket.IO, ensuring smooth multiplayer gameplay.

6. How do you handle teamwork and collaboration?
I approach teamwork by communicating openly, listening to ideas, and dividing tasks clearly among team members. I support teammates when needed and encourage collaboration to solve problems efficiently. My experience comes from school projects and volunteer programs.

7. Tell me about a time you failed or made a mistake
During the Multiplayer Sudoku project, server synchronization caused bugs during multiplayer sessions. I learned to debug systematically, test thoroughly, and anticipate potential errors. This improved project stability and taught me the importance of careful planning.

8. How do you manage your time and prioritize tasks?
I use to-do lists and break projects into smaller milestones. I prioritize tasks by importance and deadlines and balance coding, learning, and volunteering efficiently. For example, in my online learning platform project, I tackled backend API development first, then integrated it with the frontend before testing.

9. Describe a project where you had to learn something new quickly
For the Online Learning Application, I had to learn Next.js quickly to implement dynamic content rendering and authentication. I studied documentation and tutorials and applied the knowledge immediately to build project features.

10. How do you handle feedback or criticism?
I view feedback as an opportunity to improve. I ask clarifying questions to understand the suggestions and apply them promptly. For example, in the Clockodoro project, peer feedback helped me improve UI/UX, making the application more user-friendly.

11. Where do you see yourself in 3–5 years?
In 3–5 years, I see myself as a skilled fullstack web developer, contributing to scalable and interactive applications. I hope to work in a collaborative team, possibly lead small projects, mentor junior developers, and continuously learn new technologies.

12. Why should we hire you?
I have hands-on experience with real-world web development projects and a strong foundation in frontend and backend technologies. I am a collaborative, fast learner and problem solver, eager to apply my skills and contribute to the team while continuing to grow professionally.

13. Do you have any questions for us?
- What kind of projects would I be working on as an intern?
- How does the team collaborate on development tasks?
- Are there opportunities for mentorship and learning new technologies?
- What does success look like for someone in this role?
